|  | Title:<br><b>ES DRAFT UPLOAD REQUEST FORM<br/>FOR PUBLIC COMMENTS</b>           | Issue No.:<br><b>3</b>                 |

This form is used to maintain uniformity and consistency in uploading the list of draft documents for the development of Ethiopian standards for public comment.

1. The draft documents submitted for uploading shall be displayed using the table shown below:-

*ESA invites the public to comment on the following draft Ethiopian standards :-*

| Field | Title  | Number of Standards under development |               |          | Designation        |
|-------|--|---------------------------------------|---------------|----------|--------------------|
|       |  | New                                   | Reaffirmation | Revision |                    |
| EHS   | Acoustics — Determination of sound power levels of noise sources using sound pressure Engineering methods for small, movable sources in reverberant fields-Part 2: Methods for special reverberation test rooms                        | ✓                                     |               |          | ES ISO 3743-2:2018 |
|       | Acoustics — Measurement of sound absorption in a reverberation room  | ✓                                     |               |          | ES ISO 354:2018    |
|       | Acoustics — Estimation of noise-induced hearing loss   | ✓                                     |               |          | ES ISO 1999:2018   |
|       | Acoustics-Measurement of room acoustic parameters-Part 1: Performance spaces   | ✓                                     |               |          | ES ISO 3382-1:2018 |
|       | Acoustics-Measurement of room acoustic parameters-Part 2: Reverberation time in ordinary rooms   | ✓                                     |               |          | ES ISO 3382-2:2018 |
|       | Acoustics-Measurement of room acoustic parameters-Part 3: Open plan office   | ✓                                     |               |          | ES ISO 3382-3:2018 |
|       | Acoustics-Determination of sound power levels and sound energy levels of noise sources using sound pressure-Precision methods for reverberation test rooms   | ✓                                     |               |          | ES ISO 3741:2018   |
|       | Acoustics-Determination of sound power levels and sound energy levels of noise sources using sound pressure Engineering methods for small movable sources in reverberant fields -Part 1: Comparison method for a hard-walled test room | ✓                                     |               |          | ES ISO 3743-1:2018 |
|       | Acoustics-Determination of of sound power levels of noise sources using sound pressure Engineering methods for small, movable sources in reverberant fields-Part 2: Methods for special reverberation test rooms                       | ✓                                     |               |          | ES ISO 3743-2:2018 |
|       | Acoustics-Determination of sound power levels and sound energy levels of noise sources using sound pressure Engineering methods for an essentially free field over a reflecting plane  | ✓                                     |               |          | ES ISO 3744:2018   |
|       | Acoustics-Determination of sound power levels and sound  | ✓                                     |               |          | ES ISO 3745:2018   |

|  |  |                                     |                              |

|--|---|---|--|--|---------------------|
|  | energy levels of noise sources using sound pressure<br>Precision methods for anechoic rooms and hemi-anechoic rooms   |   |  |  |                     |
|  | Acoustics-Determination of sound power levels and sound energy levels of noise sources using sound pressure Survey method using an enveloping measurement surface over a reflecting plane | ✓ |  |  | ES ISO 3746:2018    |
|  | Acoustics-Determination of sound power levels and sound energy levels of noise sources using sound pressure Engineering/survey methods for use in situ in a reverberant environment       | ✓ |  |  | ES ISO 3747:2018    |
|  | Acoustics-Measurement of noise inside motor vehicles  | ✓ |  |  | ES ISO 5128:2018    |
|  | Acoustics- Frequency-weighting characteristic for infrasound measurements   | ✓ |  |  | ES ISO 7196:2018    |
|  | Acoustics-Determination of high-frequency sound power levels emitted by machinery and equipment   | ✓ |  |  | ES ISO 9295:2018    |
|  | Acoustics-Determination of occupational noise exposure-Engineering method   | ✓ |  |  | ES ISO 9612:2018    |
|  | Acoustics-Attenuation of Sound during propagation outdoors- Part 1: Calculation of the absorption of Sound by the atmosphere  | ✓ |  |  | ES ISO 9613-1:2018  |
|  | Acoustics-Attenuation of sound during propagation outdoors-Part 2: General method of calculation  | ✓ |  |  | ES ISO 9613-2:2018  |
|  | Acoustics-Measurement of noise emitted by two-wheeled mopeds in motion - Engineering method   | ✓ |  |  | ES ISO 9645:2018    |
|  | Acoustics-Soundscapes Part 1: Definition and conceptual framework   | ✓ |  |  | ES ISO 12913-1:2018 |
|  | Acoustics-Stationary audible warning devices used outdoors-Part 1: Field measurements for determination of sound emission quantities  | ✓ |  |  | ES ISO 13475-1:2018 |
|  | Underwater acoustics Quantities and procedures for description Part 1:Requirements for precision measurements in deep water   | ✓ |  |  | ES ISO 17208:2018   |
|  | Acoustics-Screens, furniture and single objects intended for interior use- Rating of sound absorption and sound elements based on laboratory reduction of measurements                    | ✓ |  |  | ES ISO 20189:2018   |
|  | Assistive products for persons with vision impairments and persons with vision and hearing impairments— Acoustic and tactile signals for pedestrian traffic lights                        | ✓ |  |  | ES ISO 23600:2018   |
|  | Ergonomics-Accessible design Auditory signals for consumer products   | ✓ |  |  | ES ISO 24500:2018   |
|  | Ergonomics-Accessible design Sound pressure levels of auditory signals for consumer products  | ✓ |  |  | ES ISO 24501:2018   |
|  | Acoustics-Stationary audible warning devices used outdoors-Part2:Precision methods for determination of sound emission quantities   | ✓ |  |  | ES ISO 13475-2:2018 |
|  | Acoustics-Assessment of noise annoyance by means of social and socio-acoustic surveys   | ✓ |  |  | ES ISO 15666:2018   |

|  |   |  |                                 |
